**December 4, 2015**

**Urban Agriculture and Climate Change**

**January 14, 2016**

**Transition to a Low Carbon Economy: How to make it happen!**

**You can now earn your SBA- Sustainable Building Advisor Certificate in only 4 exciting NYC immersive weekends and 8 Weeks of Online study-Starting October 16 !**

**The newly updated SBA Experience makes it easier and more affordable than ever to improve your green building expertise, gain real building and project experience, upgrade your resume, earn professional continuing education credits, and network with sustainability experts in your local green building community.**

**The SBA |Sustainable Building Advisor Certificate is changing !**

**BuildingGreen, Heatspring, NESEA, Earth Advantage, NYC|SBA and the industry's top thinkers are teaming up to deliver the latest in sustainable building training. You'll meet great people, master new skills, and learn to see buildings in a new way. The course culminates with a capstone project that offers real-world project experience. Sustainable Building Advisors are designers, architects, planners, builders, engineers, consultants, students, career changers and building operators who value resilience, whole system thinking, and sustainable practices.**

**Becoming a Certified Sustainable Building Advisor (SBA) is a three step process:**

- 1. Online Core Curriculum** including instruction from some of the world's top sustainability experts plus full 1 year membership at BuildingGreen.com
- 2. Local Project Experience** delivered within your local New York community by NYC|SBA in partnership with HeatSpring.
- 3. Online Exam** which can be taken any time, at your own computer.

## **The NYC|SBA Project Experience!**

**The SBA Project Experience is best done concurrently with the SBA Online Core class!**

The final deliverable for your SBA Certificate is the PROJECT experience, Report /Presentation. Your research is based on a real building or project site, for which you will develop designs, recommendations, and plans. This is an opportunity to go deep on a topic you find interesting and experience the integrated design process firsthand with access to local designers, builders, installers, and advisors. We also provide access to local buildings and projects through building tours, guest expert speakers and networking and provide Individual and group project mentoring throughout your Final Project journey.

**The NYC|SBA Project Field Experience is the most extensive field experience offered. It replicates the successful historic SBA model - a 15 year tradition of immersion in the local building community + networking + engaging with local sustainability experts.**

**The NYC|SBA Project "Immersion" option includes:**

- 4 Friday evening Guest Speaker and Networking Events
- 4 Green Building Tours on corresponding Fridays and/or Saturdays of exemplary projects.
- 8 hours of individualized and group Project Mentoring and final project reviews
- SBA Project Presentations and Graduation

**Green Building Tours also being scheduled for Fall NYC/SBA Project**

**Friday October 2 : NESEA Green Building ProTour**

Viridian Future One - Manhattan Passive House Tour

led by Janus Welton, RA, CSBA, LEED AP BD+C, VF1 Project LEED PM, Sustainable Building Advisor
