Thursday evening February 4

6 pm. lecture | networking + refreshments

Bridging the Gap Between Design & Operations

How do buildings designed to meet high performance targets actually perform?

What can designer teams learn from operational data and experience?

How can building owners, operators, and facility managers plan for short and long term adaptation?

**In this session, YR&G Green Building Consultants will speak to the
challenges and opportunities they face as they work to
bridge gaps in performance and outcomes across the building life cycle.**

Sustainability Consulting, Education, and Analysis

Ashley Muse, LEED AP BD+C, Sr. Sustainability Manager, YR&G

<http://www.yrgxyz.com/bios/ashley-muse/>
